No Time

Science and Nonduality Conference October 19-21, 2011

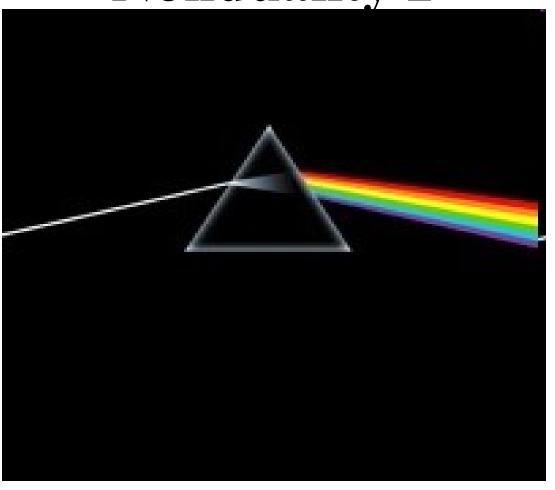

The Perception of Time Robert M. Dittler, Ph.D.

Nonduality1

Nonduality

is the state or condition of not being separate and distinct even if appearing to be so.

Nonduality 2

Nonduality 3

Nonduality, while it denies multiplicity, also denies its contradiction and subsumes both.

If you can 'see' the meaning of these words, you do not need any more definitions.

Nonduality 3a

Hint

There are No contradictions, as seeming contradictions are products of the mind, existing in the mind, and as such are only fantasies and fantasies do not exist in absolute reality, do they? - or so it seems ...

Law Non-Contradiction

Western Logic (Aristotle)

"It is impossible for the same thing to belong and not to belong at the same time to the same thing and in the same respect" (Metaph IV 3 1005b19-20)

x cannot be non-x. A thing cannot be and not be simultaneously.

And nothing that is true can be selfcontradictory or inconsistent with any other truth.

Law of Excluded Middle.

Something is either A or not A.

For example, "It is either raining or not raining;" or, "You are either wearing clothes or not wearing clothes." Some refer to this as "either/or" logic

Logic of Physics

Chaos Theory: apparently random phenomena have underlying order.

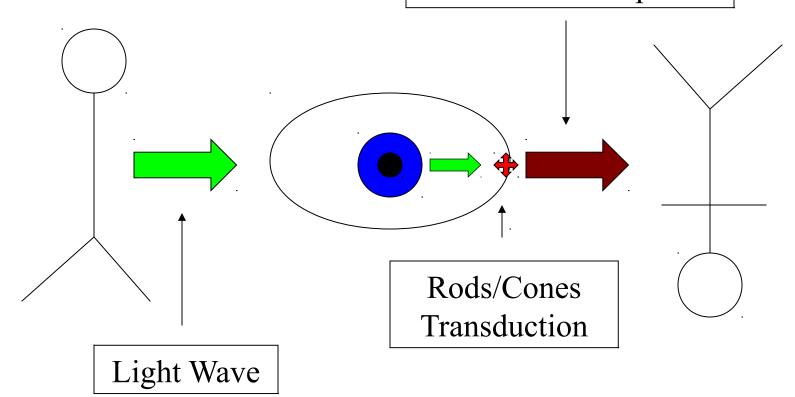

Heisenberg's Uncertainty Principle: certain pairs of physical properties, such as position and momentum, cannot be simultaneously known to arbitrarily high precision

Fuzzy Logic: computing based on "degrees of truth" rather than the usual "true or false" (1 or 0)

The Eye of the Beholder (similar for all senses)

It's All Made Up.

Fantasy – The Mind of a Child Mind Absence of Entification

Absence of Unnecessary Conditioning

Absence of Unnecessary Thinking -hence, Avoidable Suffering

Absence of Time and its Perception

Absence of Selfish Anger

Absence of Unnecessary Memory

Types of Time

- Solar Time (Day-Night)
- Lunar Time (Tides)
- Sidereal Time (Navigation)
- Galactic Time
- Universal Tome (from Big Bang)

What do all times have in common?

Measurement What do all measurements have in common? A human being to measure. Remove the human, Removee the measuring, Which, therefore, removes Time: Being but the measurement of motion.

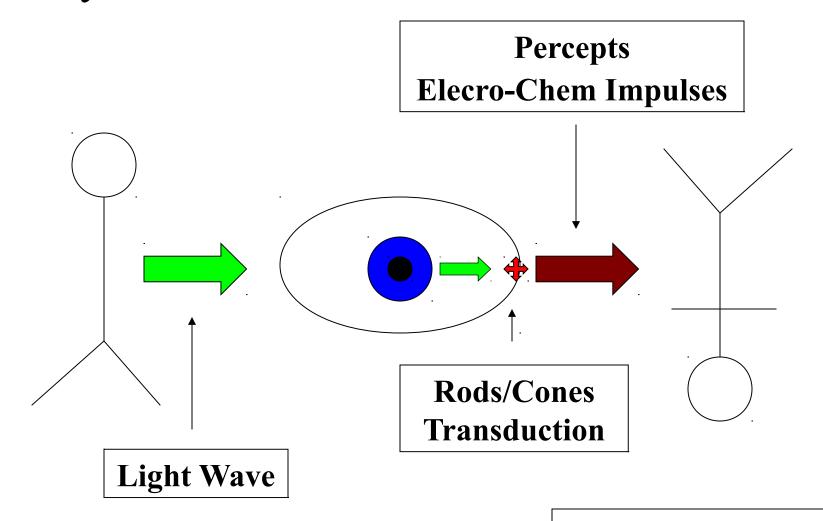

But there not must be a Past, Present and a Future!

- Where does the past exist?
- Where does the future exist?
- Where does the present exist: that which is not yet past nor future – how ever fleeting..?

NO WHERE but in THE MIND.

Is not that which is in the mind but a FANTASY?

The Eye of the Beholder

Area 17 of Brain

If Fantasy – then where & when are we?

NOWHERE?

If Fantasy – then where & when are we? (2)

NOW HERE

What is Reality? (1)

An answer rests in ourselves.
From *The Quantum and the Lotus*by Matthieu Ricard & Trinh Xuan Thuan
(ISBN 1-4000-8079-7) David Bohm
summarizes Quautum
Mechanics/Particle Physics
thusly:

What is Reality? (2)

Reality is what we take to be true.

What we take to be true is what we believe.

What we believe is based upon our perceptions.

What we perceive depends upon what we look for.

What we look for depends on what we think.
What we think depends on what we perceive.
What we perceive determines what we believe.
What we believe determines what we take to be true.

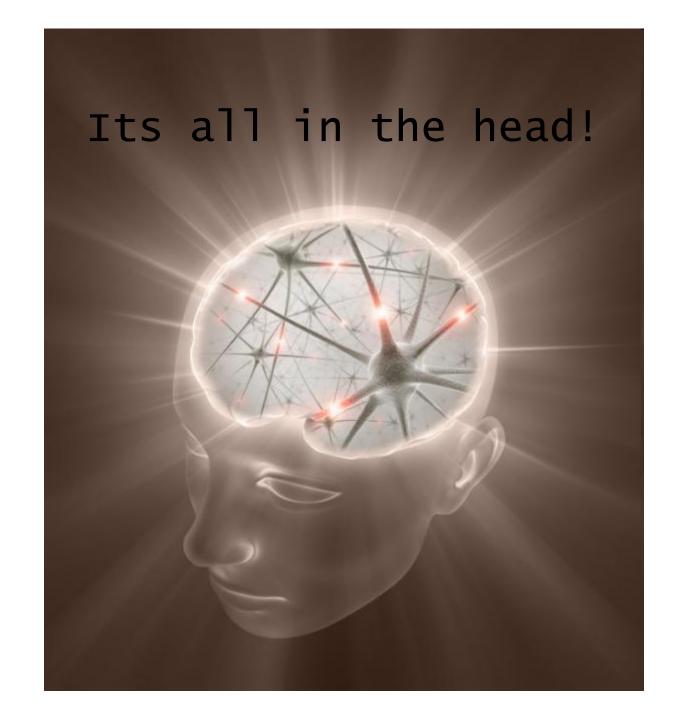

What we take to be true is our reality. (p. 121.)

What is the edge of Time?

There is no edge of time because there is No Time - remove humans to measure perceived motion, thus

-removes time.

Regardless of what we might hope, dream, or desire.

Thank you!

Enjoy the Merry Dance!

Of Life with

Merriment and Glee!

Peace and Joy!
